**Response of mayze to inoculation with *Azospirillum***

Silva, J[1*]; Pereira, A[1].

[1]University, Street, City, Zip Code, Country (presenter e-mail)

The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed.v The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed. The genus *Azospirillum* is widely known as nitrogen fixer. In the maize crop, positive benefits have been observed.v The genus *Azospirillum* is widely known as.
